K2 MARKETING PLAN A 12-MONTH BLUEPRINT

EASIER TO SELL. EASIER TO ADOPT. HARDER TO *Ignore.*

K2 is already the platform behind more than 500 KOA campgrounds, and KOA holds the operating data and owner results that show what it delivers. This plan turns those assets into a **repeatable marketing engine** that makes K2 easier for Franchise Development to sell, easier for owners to understand and adopt, and harder for the market to ignore.

PROSPECTIVE OWNERS
A proof-backed reason to join KOA

CURRENT OWNERS
More value from the system they already run

THE INDUSTRY
KOA known as the technology leader

THE ENGINE FOUR PILLARS, ONE CONNECTED SYSTEM

1 THE SOURCE

POSITION & PROVE K2

Turn proof that already exists inside KOA into proof the market can see and believe.

POSITIONING AND VALUE PROPOSITION
One K2 story told in four owner outcomes: revenue, occupancy, efficiency and staff time.

CUSTOMER PROOF LIBRARY
Customer stories, case studies, testimonials and reference owners. Validated by IS, approved by each owner.

BUSINESS-VALUE TOOLS
An ROI calculator and competitive comparisons that put numbers behind an owner's choice.

2 ENABLE FRANCHISE SALES & GROWTH
For prospective owners. Proof reaches the right prospects and equips every sales conversation.
SALES DASHBOARDS · BATTLE CARDS · ABM

3 RELEASE & ADOPTION ENGINE
For current owners. Every important release is understood, approved, communicated and adopted.
RELEASE PROCESS · KNOWLEDGE SYSTEM · ADOPTION

4 MARKET LEADERSHIP
For the industry. K2 becomes a steady source of stories the trade wants to tell.
TRADE MEDIA · BYLINES · SPEAKING · AWARDS · RESEARCH

MEASURED RESULTS BECOME THE NEXT PROOF POINT

K2 IN 2025 ON THE PUBLIC RECORD

2.3M	6.1M	3.3M	500+
reservations	credit card transactions	KampStore transactions	campgrounds on one platform

HOW TO READ THIS
Facts come from KOA's public record and are sourced on the last page. Everything else is a proposal, with targets to confirm against KOA's baselines. Sample visuals use illustrative data.

Prepared for **Kampgrounds of America, Inc.**
A 12-month marketing blueprint for K2

Kellen Levy
October 2026

PROOF THAT *Sells.*

2 ENABLE FRANCHISE SALES & GROWTH

Give Franchise Development the tools to sell K2 as a business advantage a prospect can measure. I'd start by listening to real sales conversations, then build three tools from what I hear.

A SALES DASHBOARDS K2 data turned into five simple sales stories, each tied to the features behind it.

K2 VALUE DASHBOARD SALES VIEW — Mountain West | 75 to 125 sites | 2025 season — ILLUSTRATIVE · SAMPLE DATA

Comparable KOA campgrounds (median) · This park today (owner's own figures) — *Revenue views show counsel-approved figures only*

WORK LESS AT THE DESK
71%
of reservations booked online
71%
38%
K2: online booking · Express Arrival

FILL THE GAPS IN RESERVATIONS
284
stranded nights re-opened for sale
Before ▶ After
K2: Dynamic Optimization

KNOW YOUR NUMBERS

	Park	KOA
Occupancy	52%	**61%**
Avg. daily rate	$58	**$68**
Revenue per site	$30	**$41**

K2: reporting and KOA benchmarks

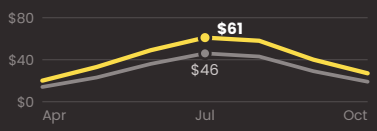

EARN MORE PER SITE
$11.30
added revenue per reservation
Add-ons $7.20
Select My Site $4.10
K2: add-ons · Select My Site

REVENUE & OCCUPANCY PERFORMANCE

Occupancy by month

Revenue per available site by month

TEST READOUT · WHICH STORY CONVERTS

First conversations that led to a second, by lead story

Fill the gaps in reservations	**58%**
Know your numbers	52%
Earn more per site	44%
Work less at the desk	37%
Revenue & occupancy	33%

Tested, not assumed. Which story works best is a hypothesis until sales outcomes say so. Stories, metrics and proof points are rotated and tracked against real results. The views would draw on the data model and owner dashboards KOA piloted in 2025.

B SALES BATTLE CARDS A living library: one card for each owner problem and each competing system.

BATTLE CARD Fill the gaps in reservations — *Use when an owner says the park looks busy but revenue is flat* — SAMPLE

OPEN THE CONVERSATION		WIN THE CONVERSATION	
1 PROBLEM	Single nights get stranded between bookings and never sell.	5 OBJECTION	*"I already have a system."* Compare outcomes, not features.
2 ASK	*"How many one-night gaps did you have last July, and what happened to them?"*	6 DIFFERENTIATE	K2 connects to KOA.com and KOA Rewards, which bring the demand that fills the gaps.
3 QUANTIFY	Gap nights × nightly rate, worked out with the owner's own numbers.	7 PROOF	A customer story from a comparable park, with the nights it recovered in one season.
4 CONNECT	Dynamic Optimization reorders bookings overnight to free up longer stays.	8 NEXT STEP	Offer a walkthrough on the owner's own site map, or a call with a reference owner.

LIVING CARD Used in 14 conversations · Top objection logged 9 times — *Revised from real conversations, objections and conversion data*

Candid by design. Each card also says where K2 is not the best fit, which is what makes the wins believable.

C ACCOUNT-BASED MARKETING Find the owners most likely to join and reach them at the right stage.

1 SEGMENT — Group prospects by path (convert, build or buy) and park profile, using CRM data and past wins.

2 IDENTIFY — Use first-party data and website behavior to see who is researching K2 and franchising.

3 PRIORITIZE — Combine fit with intent signals, so sales knows which accounts to call first.

4 ENGAGE — Match the message to the stage: insight first, then customer proof, then ROI.

5 HAND OFF — Alert the rep with context: what the prospect read and which battle card fits.

The enablers. KOA's CRM and web analytics come first. Visual Visitor (website visitor identification) and Propensity (intent data and targeted campaigns) are candidates for a pilot once segments and messages are set, following privacy and legal review.

Illustrative layouts with sample data, not KOA results. K2 features as described on KOA's franchise site; each claim would be validated with IS before use. Revenue figures shown to prospective franchisees are financial performance representations under the FTC Franchise Rule, so franchise counsel would clear them first.

Releases, adoption and industry visibility are on the **NEXT PAGE**

LAUNCH. ADOPT. *Lead.*

3 BUILD A BETTER K2 RELEASE & ADOPTION ENGINE

Every important K2 release should be understood, approved, communicated and adopted. One standard process connects IS, Product, Marketing, Sales, Communications and PR, with launch effort matched to the size of each release.

PLAN	STEPS 1 TO 3	VALIDATE	STEPS 4 TO 6	LAUNCH	STEPS 7 TO 9	LEARN	STEPS 10 TO 11
1 Product roadmap		4 Messaging		7 Owner communication		10 Adoption	
2 Release planning		5 IS validation		8 Sales enablement		11 Measurement	
3 Marketing brief		6 Approval		9 Launch		*Findings shape the next cycle*	
IS · PRODUCT · MARKETING		MARKETING · IS · COMMS		COMMS · PR · SALES		MARKETING · IS · PRODUCT	

ONE TRUSTED SOURCE

A CENTRAL K2 MARKETING KNOWLEDGE AND GOVERNANCE SYSTEM

Every team works from the same product information, approved messaging, customer proof and release history. The library holds:

- Product capabilities
- Release information
- Approved claims
- Product messaging
- KOA brand standards
- Customer insights
- Competitive intelligence
- Previous launches
- FAQs
- Sales materials

The enabler: AI search (retrieval-augmented generation) that answers only from approved content and shows its source. First drafts get faster, people still approve what is published, and it runs only in KOA-approved tools.

FROM LAUNCH TO ADOPTION

K2 records which parks have a feature switched on, so every adoption campaign can be aimed and measured with K2's own data. Working with the teams that support and train owners, I'd show the remaining parks a result from a park like theirs, then track who activates.

FIND ▶ SHOW ▶ MEASURE ▶ REUSE

ON THE PUBLIC RECORD

By mid-May 2025, reservation add-ons were live at 42% of KOA locations and had generated more than $140,000 in ancillary revenue. Every park that activates a feature like this adds to that total.

THE RESULT | Fewer silos | Less duplicated work | More predictable launches | Stronger accuracy | Consistent communication

4 ESTABLISH K2 AS A MARKET LEADER

Make K2 a recurring source of industry stories, not another product being promoted. The aim is for KOA and K2 to be seen as credible technology leaders in outdoor hospitality, with real customer and operating data as the foundation.

THE STORY ENGINE THREE SOURCES, FIVE CHANNELS

OPERATING DATA
What 500+ campgrounds show about how parks really run.

CUSTOMER RESULTS
Owner stories with numbers behind them.

PRODUCT NEWS
Launches, and what they change for owners.

▶

CHANNELS

- Trade media
- Executive bylines
- Speaking
- Awards
- Industry research

ON THE PUBLIC RECORD

A competing software provider co-hosts the Outdoor Hospitality Innovators Summit at OHCE this November. The technology conversation is already under way.

THOUGHT LEADERSHIP

Three or four themes KOA can own in campground technology, grounded in what the data shows.

A STEADY EDITORIAL RHYTHM

One trade story pitched each month and one executive byline each quarter, with Communications and PR.

SIGNATURE RESEARCH

An annual K2 operations benchmark from aggregated platform data: booking windows, length of stay, add-on revenue, occupancy.

STAGES AND AWARDS

Owners and KOA leaders on industry stages, plus award entries built on real K2 results.

Why it works: editors and conference organizers want data and operators, not product pitches. KOA has both. It already publishes the Camping & Outdoor Hospitality Report, now in its 12th year, and a K2 benchmark would add the operator's side of that story.

Sources: Woodall's Campground Magazine, June 2, 2025 (reservation add-ons). RV PRO, June 16, 2026 (Innovators Summit). KOA press room, April 14, 2026 (Camping & Outdoor Hospitality Report). The editorial rhythm and the benchmark are proposals to confirm with Communications, PR and IS.

Measurement and the 12-month roadmap are on the **BACK PAGE**

MEASUREMENT AND ROADMAP

MEASURE WHAT *Works.*

Scale what works. Stop doing what does not. Every pillar reports on the same simple chain, from first awareness to business results, against baselines set in the first 90 days.

1 AWARENESS

Is the market hearing about K2?

- Media visibility
- Share of voice
- Campaign performance

2 ENGAGEMENT

Are the right people paying attention?

- Qualified prospect engagement
- Content engagement
- Owner engagement

3 SALES IMPACT

Is K2 helping win franchise decisions?

- Franchise sales conversations
- K2 influence on decisions
- Sales conversion

4 ADOPTION

Are owners using what ships?

- Feature adoption
- Activation after each release
- Training participation

5 BUSINESS OUTCOMES

Is it showing up in the numbers?

- Reservation activity
- Revenue outcomes
- Occupancy outcomes

EVERY MONTH
A one-page scorecard: what moved, what did not and what changes next.

EVERY QUARTER
A scale, fix or stop review, so hours and budget follow the evidence.

WHERE THE SIGNAL IS
Franchise decisions are few, so sales results show direction. Owner adoption answers faster.

AS DATA BUILDS
Advanced analytics for optimization: controlled tests, then marketing-mix analysis.

THE 12-MONTH ROADMAP THREE PHASES, WITH A RESULTS REVIEW AT MONTH 9

PILLAR	FOUNDATION DAYS 1 TO 90 *Listen, align, publish.*	REPEATABLE ENGINE MONTHS 4 TO 6 *Find the rhythm.*	MEASURABLE GROWTH MONTHS 7 TO 12 *Scale the winners.*
1 POSITION & PROVE	Positioning agreed across teams. Three customer stories approved.	Proof library growing monthly. ROI calculator cleared and live.	Reference owner program running. Stories for every park type.
2 FRANCHISE SALES	Sales conversations observed. First battle cards in use.	Sales dashboards live. ABM pilot on priority segments.	Messaging tuned to what converts. ABM scaled or stopped on results.
3 RELEASE & ADOPTION	Release process agreed with IS. Knowledge library started.	Releases announced before launch. First adoption campaign run.	A campaign per priority feature. AI search added if approved.
4 MARKET LEADERSHIP	Media list and editorial plan. K2 point of view agreed.	First trade stories and byline. Speaking proposals submitted.	K2 benchmark report published. Award entries filed.
M MEASURE	Baselines set. First scorecard delivered.	Monthly scorecard. First quarterly review.	Month 9 results review. Year-two plan.

Scoped to 20 to 25 hours a week. Every target is a proposal to confirm once KOA's baselines are in hand.

WHY THIS WILL WORK

1 It starts with what KOA already owns.
The product, the data and the owner results exist today. The first 90 days need no new software.

2 Everything is built once and reused.
One customer story serves a sales call, an owner campaign and a trade article.

3 Accuracy is designed in.
IS validates product claims, owners approve their stories, and franchise counsel reviews anything that implies earnings.

4 The evidence decides.
Each quarter, the scorecard shows what to scale and what to stop.

WHAT KOA GAINS

FRANCHISE DEVELOPMENT
Stronger prospects and a proof-backed close.

CAMPGROUND OWNERS
More value from K2 with every release.

IS AND PRODUCT
Predictable launches and accurate claims.

THE KOA BRAND
Recognized leadership in campground technology.

I'D WELCOME THE CHANCE TO **WALK THROUGH THIS PLAN** AND SHAPE IT TO KOA'S PRIORITIES
